Stainless steel shapes for welded panels

Ugitech proposes a diversified and innovative range of shapes for architectural applications.

Our technical team studies each inquiry in order to optimize the elaboration of the final projects, taking in consideration as well the esthetic aspect than the weighty constraints.

The assets:

- Weldability
- Aspect regularity
- Geometrical constancy
- Mechanical properties

The applications:

- Internal design
- Street furniture
- Façades
- Canopy
- Duck-boards

Ugitech proposes any kind of stainless steel grades and more exactly for the architecture:

- 1.4404 (316L)
- 1.4307 (304L)
- 1.4062
- 1.4362.

Product characteristics:

- sections from 2 to 70mm²
- surface aspect: bright degreased or annealed finishing

Packaging: bars, coils or reels.

Alliance with all materials

- Protection
- Durability
- Timeless
- Adaptability
- Creativity
- Recyclable

The information and data presented here in are typical or average values and are not a guarantee of maximum or minimum values. Only the information reported on our material certificates is to be considered as relevant. Applications specifically suggested for material described here in are made for the purpose of illustration only to enable the reader to make its own evaluation and are not intended as warranties, either express or implied, of fitness for any purposes.
