UGITECH

Providing special steel solutions

Stainless steel shapes for welded panels

Ugitech proposes a diversified and innovative range of shapes for architectural applications.

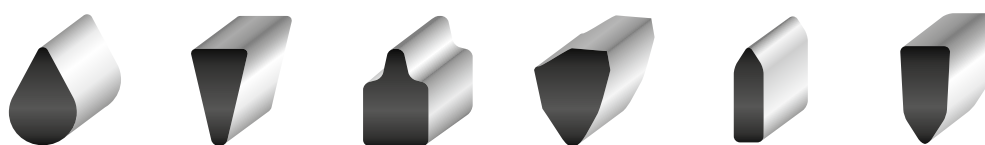

Our technical team studies each inquiry in order to optimize the elaboration of the final projects, taking in consideration as well the esthetic aspect than the weighty constraints.

The assets:

- » Weldability
- » Aspect regularity
- » Geometrical constancy
- » Mechanical properties

The applications:

- » Internal design
- » Street furniture
- » Façades
- » Canopy
- » Duck-boards

Ugitech proposes any kind of stainless steel grades and more exactly for the architecture:

1.4404 (316L) - 1.4307 (304L) - 1.4062 - 1.4362.

Product characteristics:

- » sections from 2 to 70mm²
- » surface aspect: bright degreased or annealed finishing
- » packaging: bars, coils or reels

Alliance with all materials

Protection – durability – timeless – adaptability – creativity – recyclable
